Attachment to Advisory Action

1. Applicants' amendment filed 2/12/2009 has been fully considered; however, the amendment has not been entered given that it introduces new issues that would require further consideration and/or search.
2. With respect to new issue, present claims introduce new limitations such as (meth)acrylic polymer contains 0-0.7% by weight phosphorus, hydrated metal compound is present in an amount of 48-60 vol% of the total volume of the composition, and organophosphorus compound can be copolymerizable with (meth)acrylic monomer. This is in contrast to the earlier amended claim, filed on 10/7/20008, which recited a (meth)acrylic polymer, hydrated metal compound was present in amount of 40-90 vol% of the total volume of the composition, and organophosphorus compound was not substantially copolymerizable with a (meth)acrylic monomer. Therefore, present amendment would require further consideration and/or search.
